

BEGINNING TODAY April 21st (SAME DAY AS YOUR GARBAGE PICK-UP)

To help keep Michigan City clean and ensure efficient service for all residents, the Refuse Department follows specific guidelines for Compost Pick-up. These policies are designed to protect our crews, streamline pick-up, and maintain safe and sanitary conditions in our neighborhoods. Please review the following requirements before placing containers at the curb.

- Each resident is limited to **four (4) 32-Gallon** garbage containers.
- Each container must have a lid. (We recommend drilling holes in the lid and container and attach with zip ties on one side to allow the opening and closing of container and prevent loss due to windy weather)
- Containers must be structurally sound and have operable handles.
- Each container must weigh less than 50 pounds.
- Containers cannot contain any sod, dirt, or non-organic materials.
- Compost is picked up at the curb in **front of your home** on the same day as your garbage pickup.
- If there is anything blocking your compost from being picked up, such as vehicles, your compost pickup will resume the following week.
